

**5** *Weave a flap from the top rim (optional).* You will make the design upside down, as it will fall over the front of the bag and thus appear right side up. Locate the bead labeled T (the top bead in the column of beads that starts with bead B). Repeat the mise en place. Pass through bead T and exit it from the left. (When the flap is completed, you will remove the tape and weave the tail into the flap.)

**Rows 1–23:** Weave 23 rows, following the directions for the bottom flap.

**Row 24:** Begin the design, referring to Chart B. Remember to read the chart back and forth, as you're working flat. After completing the 59 charted rows, add another row of A. Take the time to weave

decreases along the edge, starting at Row 60 as follows, tapering the flap.

### *Decrease*

At the conclusion of the row, anchor the thread by wrapping it around the thread that holds the bead you last exited and the one beneath it, then pass back through the last bead placed. Weave across the row, producing one fewer stitch in this row.

**6** *Finish the case.* Skittle the thread and any remaining tails into the body of the bag and trim them close.

*Optional design —  
to decrease 1  
bead each side  
to taper flap*
